*Low Energy Nuclear Reactions (LENR) Briefing*

The committee is aware of recent positive developments in developing low-energy nuclear reactions (LENR), which produce ultra-clean, low-cost renewable energy that have strong national security implications. For example, according to the Defense Intelligence Agency (DIA), if LENR works it will be a “disruptive technology that could revolutionize energy production and storage.” The committee is also aware of the Defense Advanced Research Project Agency’s (DARPA) findings that other countries including China and India are moving forward with LENR programs of their own and that Japan has actually created its own investment fund to promote such technology. DIA has also assessed that Japan and Italy are leaders in the field and that Russia, China, Israel, and India are now devoting significant resources to LENR development. To better understand the national security implications of these developments, the committee directs the Secretary of Defense to provide a briefing on the military utility of recent U.S. industrial base LENR advancements to the House Committee on Armed Services by September 22, 2016. This briefing should examine the current state of research in the United States, how that compares to work being done internationally, and an assessment of the type of military applications where this technology could potentially be useful.

*Minority-serving institutions and minority-owned businesses*

The committee recognizes the near-term, mid-term, and long-term impact that science and technology collaboration has on our warfighting capabilities and overall defense posture. Industry, academia, other non-governmental organizations, and Defense Department research, development, and prototyping entities, such as the Defense Advanced Research Projects Agency, all play a critical role in advancing national security. The committee is aware of the Department’s efforts to harness the talent and innovation taking place in minority-owned businesses, veteran-owned businesses, small businesses, and minority-serving institutions such as Historically Black Colleges and Universities, and Hispanic-Serving Institutions. The committee encourages the Department to continue to collaborate with minority-serving institutions and minority-owned businesses. Additionally, the committee urges the Department to increase opportunities for partnerships in science, technology, engineering, and mathematics education programs, research and development efforts, and other areas across the Department’s science and technology enterprise.
